

Laser Cutter Fund Drive!!

Bloominglabs is running a fundraiser for this laser cutter/etcher:

40W CO2 Hobby Laser (5th gen: 20"x12"+Removable Floor)

What can you do with it? You can cut acrylic and wood, as well as etching both of those and metal too! It helps people prototype new objects much faster as well as making very cool art! This tool will be available to all members as well as the general public!

We need \$4500 to make this purchase.

Currently we have _____ pledged! We only need _____ more to go!

All donations are tax deductible, use the QR code below to make an electronic donation using PayPal!
